

# WEAVER STEADMAN

## REMOTE HEADS

WHITES  
SPECIALTY EQUIPMENT

The Weaver Steadman is a light-weight modular fluid head system. It can be built in two or three axis mode and is capable of balancing a loaded digital camera with a 24-290mm lens. Set friendly, the Weaver Steadman head is easily adjustable with one allen key (supplied) and quick release pins. This is an ideal, manually operated head for a jib arm.
