

MOSYS L40

REMOTE HEADS

WHITES SPECIALTY EQUIPMENT

The Mo-Sys L40 is the newest in a line of light-weight, extremely strong remote heads. It was designed as a simple, "tech-less" system with all the functionality expected of a modern digital remote head, including a gyro assist back-pan. This is a feature generally only available on technician operated, fully gyro-stabilized systems. The L40 is ready out of the box, one cable to the head and power to the console. Mount your camera, press enable and shoot. The L40 only weighs 38 lbs and can easily manage a 100 lbs payload or any standard camera package. The intuitive button/dial console provides all the most common digital functions required for simple, quick, ease of use.
