

ALPHA STABILIZED REMOTE HEAD

REMOTE HEADS

WHITES SPECIALTY EQUIPMENT

The Alpha Stabilized Remote Head features a unique design making it very quick to set up for any camera package including 3D with an impressive max payload of 150lbs. At only 55lbs the Alpha is incredibly responsive and boast top tier stabilization. Slip rings through all three axis make cabling this system clean with no concern for tangles for multiple rotations. The Alpha features auto horizon, programable stops, a choice of three operation modes and independent axis stabilization.
