

MOTION IMPOSSIBLE - MANTIS

REMOTE HEADS

WHITES SPECIALTY EQUIPMENT

The Motion Impossible Mantis remote dolly combined with the exceptional Shotover G1 gimbal makes a whole new range of shots possible. This dolly can be run up to 300m/1000', it's quiet electric motor makes it possible to get into difficult to reach areas. The Mantis can be set up specifically for controlled, lower speed applications or boosted to reach up to 20mph. This kit comes with three different tire options for smooth studio, mid range pavement and larger off-road/rough terrain.
