

CANON K-35

LENS REHOUSING

CLASSIC HIGHSPEED CINE LENSES

P+S TECHNIK
Optics for Exceptional Images

These rare and attractive lenses cover* Full Frame (36x24). Equipped with a completely new cam drive mechanism to handle the floating elements these classic lenses are ready for modern lens motors and offer a focus throw of up to 270°. The aperture mechanism has been improved too.

We have again deepened our knowledge in lens mechanical design and achieved a great price-performance-ratio by using a modular system. Canon K-35 and Canon FD lenses are now mounted into

our SL-housing with a front diameter of 110mm. With the SL-housings P+S Technik offers its first lens rehousing for lenses with floating elements. A Canon K-35 lens set can be completed very well with the Canon FD focal lengths of 14 mm, 100 mm, 135 mm and 200 mm.

The K-35 lenses were manufactured by Canon during the 1970s and early eighties and won an Academy Award in 1976. These lenses looked at many features sets amongst those are "Alien" (1986) and "American Hustle" (2013).

Rehousing is available for Canon K-35 and Canon FD lenses.
