

# FLIGHTHEAD COMPACT

## REMOTE HEADS

### WHITES SPECIALTY EQUIPMENT

The Flight Head Compact (FHC) is a dynamic, light weight gyro-stabilized remote head, ideal for both vehicular and crane applications. The FHC is part of the "industry standard setting" Flight Head group of remote systems made famous for it's work on the Russian Arm. The FHC can handle a perfect horizon in high G turns and interfaces with a Preston FIZ for an operator using the super responsive joy stick controller. The quick set up time and ease of use make this remote head perfect for the wide range of articulating cranes at Whites.

*Optional Joystick with FIZ integration*

### Flight Head Quick Specs

Gyro Stabilization
