

# MOSYS L40 BROADCAST SYSTEM

## REMOTE HEADS

### WHITES SPECIALTY EQUIPMENT

The Mo-Sys L40 is the newest in a line of light-weight, extremely strong and rigid remote heads. It delivers an all-in-one solution to broadcast productions with the use of a user friendly single operator broadcast desk. The intuitive push button/dial controls for all the basic functionality combined with the familiar joystick and focus/zoom controls make this system an easy transition for broadcast operators. The L40 drives Canon or Fuji servos with a simple lens box. Optional focus servos are available as are CanBus to fibre optic control cables for long cable runs. This system comes packaged in two cases and can be set up in minutes.
