

WILD CAT DOLLY

ACCESSORIES AND SUPPORT EQUIPMENT

**WILLIAM F. WHITE
INTERNATIONAL INC.**

A COMWEB GROUP MEMBER

The Wildcat is not just another "desert dolly", but a carefully engineered wide profile tire-based tracking/load carrying dolly that can tackle a multitude of roles on set. It is light enough to lift onto a roof rack, but tough enough to lug over a ton of load. Fitted with precision wheel hubs and optimum steering geometry, it can handle demanding tracking moves where tracks are not feasible. This dolly can be used in low mode or flipped over if more ground clearance is required. Standard Giraffe Crane track wheels can be fitted, transforming this dolly into a light but stable platform for those critical tracking moves. The Wildcat is constructed using corrosion proof materials and finished in a tough epoxy powder coating, making this dolly a low maintenance, extremely durable and versatile piece of equipment.

Wildcat Dolly Quick Specs

Length	67.2"	1.7m
Width	50.4"	1.3m
Height	40.8"	1.0m
Weight	132lbs	60kg
Platform Height (low mode)	8.5"	0.2m
Platform Height (high mode)	13"	0.33m
Load Capacity	2200lbs	1000kg
