

# TAURUS MOBILE CRANE BASE

## CRANES

### WHITES SPECIALTY EQUIPMENT

The Taurus 4x4 mobile base was designed to get a crane to positions that would have been essentially impossible by pushing them manually. The Taurus features four wheel independent suspension so should one wheel slip it can keep pushing on! Besides getting to remote locations the Taurus can move a 50' Super Techno with ease. If your desired base position isn't level, the Taurus has four corner hydraulic chassis stabilizing jacks and an independent multi-directional hydraulic column leveling system that also has provides up to 24" of lift.

### Taurus Mobile Crane Base

Length	12'11"
Width	6'5"
Height	6'3"
Weight	6000lbs
Weight (w/30' Techno approx.)	8500lbs
Weight (w/50' Techno approx.)	9700lbs
