

# FANTOM ELECTRIC

## CAMERA CARS

The Fantom electric car was built with attention to detail and an extensive knowledge of what filmmakers need in a shooting vehicle. The Fantom features a long lasting 36-cell LiFePO4 pack with an AC75 Motor by HPEVS, getting the vehicle up to 70km/h with instant torque. No generator required: the built-in 15A, 120V sine wave inverter can power a range of accessories including a LW Techno 22 or 15, making this one incredible quiet, versatile vehicle. A smooth ride is provided by full air suspension by Ridtech and two different styles of tires, location dependent. All the Fantom surface plates are tapped 3/8-16 and includes a large assortment of grip pipe and clamps.

### SPECIFICATIONS

- **Weight:** 3500 lbs - 1588 kg
- **Length:** 120" - 304 cm
- **Width:** 120" - 304 cm
- **Height:** 34" avg - 86 cm avg
- **Height to crane mount:** 66" - 168 cm
- **Speed:** 44 mph - 70 km/h

### FEATURES

- 70 km/h from 36-cell LiFePO4 battery pack
- 15A 120V sine wave inverter
- 7" Ridtech air ride suspension
- Can safely carry several different telescopic arms
- Supplied with pipe and clamps
