

YIPMAN

YOKE

A SUNBELT RENTALS
COMPANY

One of the most important factors to consider when preparing a scene is working out the position of the lights. The YipMan Yoke available from William F. White (WFW) provides clients the freedom to remotely control popular LED lighting fixtures to suit the needs of the production. When paired with a Sunbelt Rentals aerial work platform, this motorized yoke, remotely controlled via wireless DMX, can get your light right where you need it. This offering from WFW is an innovative and safety-certified solution for lighting at great heights.

SPECIFICATIONS

Weight: 96 lbs

Weight/Load Capacity: 265 lbs

FEATURES

- Ability to remotely pan, tilt, and rotate attached fixtures
- Multiple units can be controlled via wireless DMX from one controller
