

YIPMAN

MOTORIZED YOKE

A SUNBELT RENTALS
COMPANY

The YipMan Yoke is a remote-controlled motorized yoke for mounting LED and balloon lights to studio grids and aerial lifts. Fully DMX compatible, you can pan, tilt and rotate your light from your board, your tablet or your phone.

When paired with a Sunbelt Rentals aerial work platform with the Quick Mount system, you can easily and safely get your light up in the air and where you need it.
